

# Our Employees' action for the world

## Waste Bank Project

- Hotel businesses generate large volumes of waste every year that endanger the local natural attractions. Therefore, we concern to reduce the amount of waste by organizing waste bank project in order to divide waste into each category, coordinate and sell the waste with local communities and organizations who take responsible for receiving waste and buy it.

## Carbon Footprint

- Rising carbon emissions are accelerating climate change with impact to communities and biodiversity. We intend to reduce the climate impact so; the hotel operates by joining the carbon footprint reduction project for reducing the fuel consumption and greenhouse gas emission, as well as acting in a responsible and environmentally-sustainable manner. The project enables hotels to minimize the impact on the environment by giving the compensation to support local organizations who take responsible to produce alternative energy for protecting the environment. Additionally, we became to Thailand's First Carbon Neutral Hotel ; Sivatel Bangkok has been certified Carbon Neutral by Thailand Greenhouse Gas Management Organization. We contribute CO2 emission totally 2,379 ton in 2017 however, we take action in terms of offsetting the total amount of CO2 emission into "Zero" (Carbon Neutral).

## Organic Farming

- In consideration of the importance of environment and sustainability, we encourage our employees to give something back to our world and enhance them to know how can we reduce the negative impacts by growing the freshly vegetables by ourselves in order to offer purely organic vegetables without any synthetic chemical treatments and our restaurants use the vegetables instead of buying them which reduces carbon emission. Exceptional reducing the impacts of environments, providing the best quality of products it's also distributing the income to them.
